5 STARS!! This game is amazing, an insane amount of fun and a great workout. I held off buying beat saber because I didn't know if you could import songs into that so I can't compare directly to that game. Importing songs on this is as easy as picking them from a folder on your hard drive within the game. Careful this is an addictive game, after "testing it out" I found that I had spend an hour playing and didn't realize it. I got this on sale for \$10 and at that price this is a no-brainer, get it now!

My only complaints (since this is the early version and the developer wanted feedback) is 1) setting the height seems to be off, it tries to make me 1m tall and won't let me change this. I am about 6 foot (2m) so I'm not sure it is trying to calibrate based on the height of the controllers. If that is the case, it isn't clear in the instructions. 2) the headbut doesn't seem to work no matter how hard I try, this might be related to the height issue above.. I'm hooked...I will stop going to the gym I think...More fun at home playing with the kids and having a workout...;-). Fun game, this will be my goto game to burn loads of calories, gets addictive when playing it with your favorite songs.
